## The 1<sup>st</sup> International Conference on Biology

Theme:  
*Biodiversity, local wisdom, and sustainable  
development in the digital era*

Jayapura,  
19<sup>th</sup> and 20<sup>th</sup> October 2019

## Introduction

Indonesia as one of the countries with highest biological resources has become the attraction for International community. Until now the high level of biodiversity has not been balanced with overall utilization and conservation effort. As an agricultural nation with the largest marine system in the world, Indonesia is currently the leading country in terms of supply for germ plasma. The importance of biodiversity plays an essential role in supporting the development and quality of the people in Indonesia. As a region with high biological resources, Papua has a responsibility for this mission especially in facing the industrial revolution 4.0. Therefore, Biology Department, Faculty of Mathematics and Natural Science, Cenderawasih University, Jayapura will held the International Conference on Biology as contribution of academic society to share the information and research finding.

## Aims

The aims of this international conference are:

1. To facilitate researcher/lecturer/biology concerned citizens to present their study result in International scientific forum
2. To present and publish the research found
3. To establish collaboration between lecturers/researchers from several Institutions

## Benefits

The participants could present their research summary, gain knowledge regarding biological research update and also allowed to publish their study on International Journal with Scopus Index.
